

## THE BENEFITS

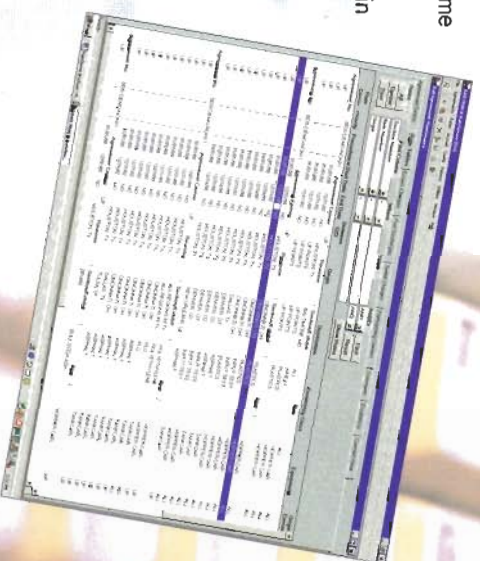

### RateServer® provides:

- Freight contract and payment management functions as bolt-on modules to any ERP system.
- Unified freight management for rail, truckload, and LTL freight modes. Also supports inland and ocean-going marine modes and insulary charges.
- Calculates linehaul rates based on origin, destination, commodity, commodity class, equipment type, equipment owner, origin/delivering carrier, prepaid/collect, or customer-specific.
- Provides versatile and universal definition of all types of assessorial charges and their pricing structure.
- Handles add-in charges for rail switch, fuel surcharges, and truck stop-offs.
- Handles contracts as point-to-point, mileage, and quantity breaks.
- Scale types are: Rate/Unit, Fixed, Excess/Unit, Excess over Min/Mile, Over Min/Unit, Excess Min/Mile, and Cumulative.
- Provides easy rate escalation management at all levels – carrier, contract, origin, destination, product, and equipment.
- Provides what-if analysis for least-cost moves.
- Recl-time freight cost reporting by mode, carrier, traffic lane, commodity, and customer.

### TRANSPay® provides:

- Optimized cash flow management related to freight payments by calculating best time of disbursement.
- Allocates freight costs to appropriate business unit within the corporation.
- Freight cost assignment by general ledger codes based on system-defined rules.
- Provides match-pay capabilities with a versatile definition of line-item tolerances to lower invoice processing requirements.
- Interfaces with A/P systems to calculate and age freight accruals and creates the payment requests for disbursement.
- Records disbursement details such as check number, mail date, etc.
- Auto-pays freight for all carriers.
- Monitors multi-mode shipments for volume commitments and rebates.
- Offers a total return on investment within 6 to 12 months.

*RateServer® and  
TRANSPay® are easy  
to use and powerful  
software modules  
that address freight  
contract management  
and automatic  
freight payment.*
