

THE BENEFITS

RAILTRAC® provides:

- Railcar tracing by customer, route, product, BOL, arrival times, and custom fields.
- Exception reporting of off-route, non-moving, bad ordered, no-bill, and late/early shipments.
- Historical shipment analysis by route and route segment.
- ETAs based on historical traffic lane movements with user-defined sampling parameters.
- Customer car retention and origin car retention analysis.
- Straightforward route and consignee management.
- Segment fleet reporting and shipment analysis by fleet and business group.
- Car profiling including lease, test, and mechanical profiles with user-defined values.
- Lease contract management.
- Detention reporting and invoice and provides an interface to A/R systems.
- Best day of week shipment optimization.
- The RAILTRAC.com e-commerce system provides advance shipment notice to your customers and shops via the Internet.

RAILACT® provides:

- A rail fleet ledger to record and allocate all cost and revenue transactions to the appropriate business units. It handles the following transactions:
 - Repair Invoices and Credits
 - Lease Invoices and Credits
 - State Taxes
 - Demurrage Paid
 - User-defined Miscellaneous Expenses
 - Asset depreciation
 - Mileage credits and equalization
 - Sublease revenues
 - Detention Invoiced
- Costs and revenues are summarized by the business unit with cost center codes which provide a link to accounting systems.
- Each record is assigned the appropriate transaction code and business group assignment so total costs and revenues can be summarized and exported to host accounting systems.
- Repair reporting is based on the AAR/NITT Job Code structure for easy reporting by fleet/business unit breakdown, duplicate billing, and repetitive repairs.
- Sophisticated mileage audit functions.

*RAILTRAC® is the
most widely used rail
fleet management
system with over
70 shippers realizing*

its benefits!

*RAILTRAC® can be
installed on your corporate
network or hosted by
Bourque Data Systems
at an extremely
cost-effective rate!*
