BDS and OxyChem Sign Railcar Maintenance Service Agreement
Agreement expands BDS services customer base to more than a dozen.

The Woodlands, Texas – January 20, 2007 – Bourque Data Systems, Inc. (BDS) announced recently that it has signed a multi-year agreement with Occidental Petroleum Company (OxyChem) to administer railcar maintenance projects for OxyChem's rail fleet. As part of the RAILTRAC® Maintenance Service (RMS) agreement, BDS will assist OxyChem in the areas of maintenance scheduling, repair cost analysis and audit, compliance with government regulations, and UMLER registration. Leveraging its knowledge of railcar maintenance and software systems, RMS will ensure a streamlined maintenance process for OxyChem.

Since expanding its RAILTRAC® Expediting and Maintenance Service programs in late 2005, BDS has increased its service program customer base to more than a dozen clients. With the opening of new office space this spring, the BDS logistics team use BDS software and state-of-the-art telecommunications system in order to efficiently support its industrial clients.

About Bourque Data Systems, Inc.

Headquartered in The Woodlands, Texas Bourque Data Systems (BDS) provides multi-mode transportation software and services for industrial shippers. Since 1990 with the introduction of RAILTRAC®, BDS has automated all facets of the shipment, asset, and freight process and is now the leading rail fleet and shipment management software for industrial shippers. BDS software streamlines multi-mode shipment operations, tracking procedures, fleet accounting, freight payment, supply chain and VMI programs, and our data services connect suppliers, customers, carriers and vendors.
